

## Anuj Bhalla

Digital and Cloud Transformation Leader  
President & SBU Head, APJI Enterprise

Anuj Bhalla is President and SBU head for APJI enterprise business at Tech Mahindra. He is an experienced digital and cloud leader. His last two roles include President and Group Chief Digital officer at RPSG Group and SVP and Chief Delivery Officer at Wipro Ltd. He has led the transformation conversations around capabilities in Digital, Cloud, IoT, and BPO.

In his current role, Anuj heads the charter of profitable business growth through value creation for customers with solutioning on new-age technologies enabled by delivery transformation teams and partners. He has led the strategy for digital roadmaps across verticals like retail, energy, manufacturing in his role as Chief Digital Officer. Here, he was responsible for delivery teams that implement next-gen technology services for global customers, cutting across industry verticals and technical domains.

Anuj has been instrumental in formulating the strategy on design and execution excellence, and has implemented new delivery framework to help customers Imagine, Build, Run the future of their industries, and transformation delivery through game-changing initiatives around process, technology, and people transformation.

Anuj is a customer-centric leader with a passion for excellence and unrelenting focus on rapid execution handling large global teams. He has over two decades of a proven track record across business development, practice development, IT strategy, transformation, pre-sales & delivery for areas such as hybrid cloud, open source/open stack. He was on the panel of Partner Advisory Board of leading OEMs. He was also instrumental in framing new initiatives on software defined infrastructure (SDI) and open-source solutions which culminated with the launch of Wipro's Open Data Center, SDI Center for Excellence.

Anuj actively contributes to leading tech-business journals and magazines in both print and digital media on topics, such as modern service delivery and IT infrastructure transformation. He is a new age-leader with an active presence on social media through various brand platforms, websites, LinkedIn and Twitter. He also actively interacts with the analyst community and has been invited for speaking engagements at premier analyst events where he shared his perspectives on emerging technologies like software defined open data center and open cloud platforms as well as the evolving role of IT service providers in the digital age.
