

Legacy & Disparate Systems are no longer the Achilles' Heel of Digital Transformation. Bank on APIs to untangle the conundrum!

## **Tech Mahindra - MuleSoft Practice**

**Your Trusted Partner in Legacy Modernization & Digital Transformation**

**Farewell, Divisions! Hello, Connections!**

Connected World.  
Connected Experiences.

# Transform Enterprise Legacy to Digital Architecture

## Accelerate Innovation & Digitization using APIs

Harnessing the power of Digital for growth is the new-age survival mantra in the business world. With a myriad of internal enterprise applications and the explosive growth of mobile and cloud apps, those who do not embark on the digital transformation journey will only become the Enterprises of the Past. However, the burden of Legacy IT, fragmented systems and siloed data act as brakes slowing down the pace of this journey.

Application Programming Interfaces (APIs), the technological creations of engineers to connect components, have now evolved as the innovation drivers meeting the escalating demands of the new digital business ecosystem.

Tech Mahindra has partnered with the Gartner Leader, MuleSoft, to enable our clients embrace bi-modal IT -- move legacy forward, connect systems, unlock siloed data, and accelerate digital transformation through the power of Integration.

### Consultation Services

- Integration Maturity Assessment
- Digital Integration Strategy & Roadmap
- API First Approach Strategy
- API Architecture Strategy
- API Product Selection Strategy
- Experience API Strategy
- Single View of Records (SVOR) API Strategy
- API for Microservices Architecture
- API for IOT Initiatives Architecture
- DevOps for API Strategy

### Frameworks & Vertical Services

- Bank as a Service
- Airport Commerce Engine
- Partner On-boarding Manager for TTL
- Mule API Container Environment Management
- Partner Lifecycle Management
- V-Connect (Voice Connect Platform)
- MCAP – (Container Infra Management Framework)
- MSP - Run Time Platform for Microservices Implementation

### Implementation Services

- Integration Competency Centre (ICC)
- Migration Services
- Digital Partner / business platform setup and run
- Partner Integration Services
- Cloud (SaaS) – On-premise / Hybrid Integration
- Mobile / Digital Channel Integration
- Device (IoT) Integration

## Our Complete Offerings Portfolio

# Tech Mahindra Simplifies Customers' Transformation Journey using their Utilities & Frameworks

## Tech Mahindra has a dedicated MuleSoft Competency as part of Enterprise Integration Solutions Practice

### ESB

- Code Review
- Auto Deployment Service
- Exception Handling Framework
- Automated Testing Framework
- Audit and Logging Framework

### Tools to Automate CI/CD Capabilities & Scripts

- Spinnaker (Cloud Native)
- Jenkins
- Bamboo
- Nexus Repository

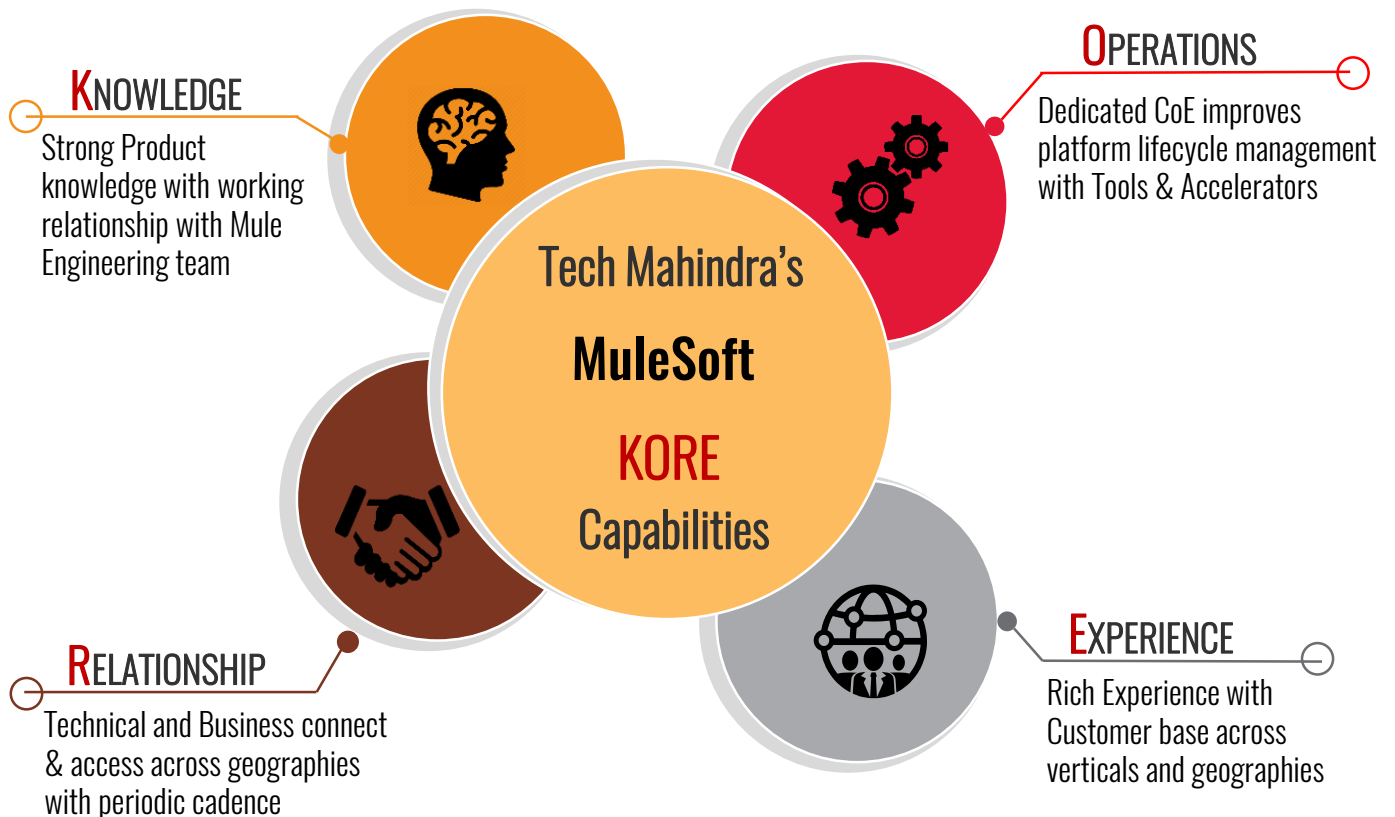

### API

- Validation and Repackaging Service
- Custom Policies
- On-boarding Scripts
- Authentication and Authorization Access
- Custom identity federation with PingFederate
- Solutions for Compression (Data Size)
- Migration Utility Role Access Extension

### TechM Mule Adapters

- KeenIO Adapter – For Analytics platform
- Zipkin Adapter – For Microservices
- Maximo Adapter – For Asset Mgt.
- Connectors for AWS Services
- Image Recognition, Dynamo DB etc.,
- Connectors for Splunk

Tech Mahindra always stands true to its new brand positioning, 'Connected World. Connected Experiences.' It is no surprise that our global partnership with MuleSoft, whose mission is 'Connecting the world's applications, data and devices', is delivering superior customer experiences in every moment of truth!

# Few Tech Mahindra Aided Digital Transformation Journeys

## US Logistics Company

Helped to build a next generation Industry platform as a single point marketplace for carriers and shippers through new integration layer, API management system to onboard & manage carriers and shippers, and ESB roadmap

## French Aircraft Manufacturer

Enabled enterprise wide API connectivity with real time visibility from shop floor to board room, improving efficiency in both Production & Operations

## Australian Equipment Company

Enabled successful transformation journey for a leading construction equipment and chemical company by integrating assets with applications for real-time monitoring and actions

## US Toy Manufacturer

Helped to scale up the client's D2C sales transactions and compete stronger in the marketplace, by bringing a new cloud based Integration layer for their ecommerce platform to integrate 3PL and SaaS vendors

## US Network Provider

Enabled the client to reposition & evolve in the SDN space by creating a SW wrapper over their hardware products, which enabled on-demand provisioning for their end customers through integration with CRM

## ENTERPRISE INTEGRATION SOLUTIONS (EIS) PRACTICE

Tech Mahindra's Enterprise Integration Solutions (EIS) practice, has been delivering Integration & Business Process Management projects to transform our clients' businesses and make them digital ready. Our strong experience of over two decades has earned us critical acclaim amongst leading analysts, and many awards from our customers and alliance partners alike.
