The COVID-19 pandemic has forced Organizations to quickly enable their employees to work remotely for an extensive period of time. Having people work remotely changes many things. This sudden spike in Work From Home scenario has exposed enterprises to serious security risks that security teams across the world are grappling with. Cybersecurity has been the most vulnerable area for all Organizations in the current situation as it encompasses everything that pertains to protecting our sensitive data, personally identifiable information (PII), protected health information (PHI), personal information, intellectual property, data, governmental and industry information systems from theft and damage attempted.

Hence cyber defense mechanism is most essential for all organizations for Protection of enterprise mission critical application environment

The most common risks for companies when it comes to remote workers are the following:

- Inadequate threat monitoring to address the heightened scale of incidents
- Continuum of attack surface expanded to WFH – Remote Workers
- New users and partially compliant end points leading to risk exposure
- Complex & dynamically changing IT and IT GRC controls

How do we address this?

Tech Mahindra’s AI BASED CYBER DEFENSE PLATFORM SOLUTION is a fast & remotely deployable, cost-effective and have cloaking capability against attacks and help Organizations to stay ahead of the curve.

This solution can help in

- AI Based Automated threat detection and response resulting in minimum human intervention
- Addressing shortage of SOC Analysts during COVID crisis by leveraging Artificial Intelligence
- Cloud Based AI-SOC Integration for Remote Security Incident Monitoring & Response
- Integrated and Continuous End-Point Threat Detection & Response

AI Based Cyber Defence

Business Benefits

- Cloud-based & Light-weight solution
- OPEX based Model and No upfront CAPEX or investment commitment.
- Push deployable within 4-7 days
- Scalable and flexible to handle surge in user volume
- Leverages existing setup
- Proven AI Cyber Defence Platform
- Cost-effective @ $xx/EPS/month or $xx/GB/Month or $xx/User/Month
- Compliant with US-CERT released advisories
- Plug and Play, Easy to Deploy 200+ Use Cases (Developed by Tech Mahindra)
