

## App-celeration at your fingertips!

Building and deploying enterprise-grade apps at speeds that match your needs!

Are you struggling to make your business mobile-ready?  
Do you want to modernize your applications for the digital world?  
Are you stuck with legacy systems that are outdated?  
Do you dread traditional app development cycles that take forever to complete?

If you said yes to any of these, **Tech Mahindra is your answer!**

With Tech Mahindra's Outsystems competency, you can build enterprise-grade apps in weeks, at a fraction of the cost and effort!

**LET THE NUMBERS DO THE TALKING!**  
With Tech Mahindra and Outsystems, you can

Boost productivity by  
Reduce operational cost by  upto **50%**

Reduce effort by  
Improve time to market by  upto **60%**

Reduce maintenance costs by  upto **70%**

## The Tech Mahindra Outsystems Competency: An Introduction

Tech Mahindra is the Global Alliance Partner for Outsystems, the #1 low-code platform. We combine the power of low-code development with advanced mobile capabilities, enabling visual development of applications that easily integrate with existing systems. The platform enables rapid deployment of apps from a single application design and code base, with functionalities that bring in never before flexibility and adaptability to change. It also reduces manual coding and defects, thereby increasing the user's overall efficiency and productivity.

### Key Features

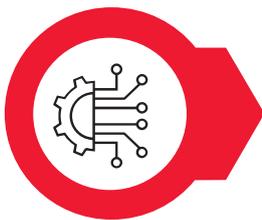

- **User Friendly Applications:** With a friendly interface and easy navigation, Outsystems provides built-in plugins that greatly reduce time in developing the standard components.
- **Easy Data Migration and Visualization:** Data from existing systems can be transferred to the Outsystems platform in just a click or two. Bulk data can then be visualised as insightful graphs and charts.
- **Integration, No Matter What:** Hassle-free Integration with external devices and other systems like SAP, SaaS, legacy, and so much more.

### What's In It For You?

In addition to the speed, control and scalability, Outsystems also delivers the following benefits:

- **One stop solution** for digitization and maintenance of applications.
- Open standard architecture codes enables enterprises to **adapt to future technology** changes.
- **Continuous visibility** throughout the development cycle.
- Changes can be accommodated with **zero impact on business continuity**.

### Service Offerings

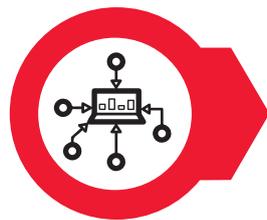

Legacy transformation of applications

Web/Mobile Application development/Modernization

High-Productivity Data Manipulation and Visualization

Rich Device Integration

**Simplicity & Speed**  
**Future proof**  
**Multi-vertical competence**

Telecom | Process Manufacturing | Automotive | BFSI |  
Healthcare | Travel, Transportation & Logistics

# Don't Just Take Our Word For It!

## Client Success Stories

### THE CLIENT: A LEADING CHEMICAL MANUFACTURING COMPANY

#### The Problem:

Inefficient processes, Fragmented data and Slow Time to Market.

#### The Solution:

Tech Mahindra built a storage management application, consolidating 4 of the clients' legacy Lotus Notes applications on Outsystems, as part of the client's digital transformation initiative. The solution not only provided a complete registry for all chemicals stored across continents, but also ensured the alignment of master data between distributors and all other stakeholders.

#### Business Benefits:

- Improved process efficiency by 45%
- Operational cost reduced by 60%

#### The Team:

2 certified developers + 1 Architect  
Time to market: 4 Weeks

### THE CLIENT: A LEADING LOGISTICS COMPANY

#### The Problem:

Paper-based Manual Processes, Operational Inefficiency and Lengthy Sales Cycles,

#### The Solution:

Tech Mahindra built a mobile-based field force application that helped manage a large fleet of vehicles and drivers. It enabled in tracking, monitoring and managing the fleet along with driver management, trip management and hours of service. The solution is integrated with Google Maps, Telematics & Efficient Fuel Network.

#### Business Benefits:

- 100% increase in tracking efficiency
- 100% fraud detection by bundling in digital customer signature verification
- Significantly improved productivity, accountability and transparency from the fleet

#### The Team:

2 certified developers + 1 Architect  
Time to market: 6 Weeks

## THE CLIENT: A LEADING AUTOMOTIVE COMPANY

### The Problem:

Inefficient processes, Alarming lack of product & service visibility

### The Solution:

Tech Mahindra helped in building a user-friendly mobile application that is focused on chauffeur-driven rentals, self-driven rentals and leasing/renting of private cars for a large audience in Europe.

This solution acts as an one stop point for rental services provided around the users' location, validating user details with an integrated authorized API, real-time pricing index and an adjustable pick-up or drop point facility.

### Business Benefits:

- Faster time to market by 50%
- Service fulfilment time reduced by 40%

### The Team:

2 certified developers + 1 Architect

Time to market: 6 Weeks
