

## CASE STUDY

Guidewire configuration and integration for ClaimCenter deployment, architecture, and project management services, along with lead deployment of client group document management solution **for one of the largest private motor insurers**

1. Digitized claims platform for quicker claims response and settlement
2. Online access to documents for all customers.

### Business Problem

The customer embarked on a strategic initiative to replace all of their legacy systems across their direct and intermediated businesses and accumulated a number of legacy platforms across these businesses with the directive to move to consolidating systems across Australia and NZ.

### Our Solution

We led the Guidewire configuration and integration for ClaimCenter deployment, architecture, and project management services.

We also led the deployment of the client group document management solution using OpenText VRD and the new cloud-based version of SmartCOMM
