# Tech Mahindra

# Supporting Leading Australian Packaging & Distribution Firm with Seamless Carveout Divestiture

CASE STUDY.

Connected World.
Connected Experiences.

# CLIENT BACKGROUND

The client is a leading packaging and distribution company headquartered in Australia. The company manufactures fiber packaging (recycled paper, corrugated boxes, cartons and distribution of packaging materials), beverage packaging (glass bottles, beverage cans, and wine closures) in Australia and New Zealand, and offers packaging and distribution services in North America.

## Business Objectives

The client had sold its fiber packaging business to a Japan-based paper company, which has a unit in Australia. And therefore needed help with:

- Functional and technical separation of both fiber packaging and beverage packaging business units

- Minimal disruptions to the business to ensure a seamless transition

- Smooth transition of the acquired business without affecting the retaining business and IT applications

- Meeting legal requirements pertaining to data

# SOLUTION

Tech Mahindra has decades of expertise in supporting organization through various divestments and acquisitions, making us the preferred solution provider to the bottling major.

## Tech Mahindra Approach

From Day One, our carveout design principle was applied to ensure minimal disruption to its stakeholders (including customers, suppliers, and employees); and we also ensured:

- Analysis of applications and development of the roadmap
- Deploy like-to-like application infrastructure
- Iterations of mock runs of replication with a focus on optimization of scope and outcome of functional/integration testing
- Mock run of the cutover focused on baselining the timelines
- Provision for access to migrated applications ahead of final cutover

## Our carveout design principle

**Expedite**
Shorten migration time frame

**Minimize**
Application downtime and business disruption

**Minimal /no change**
No change in end user experience

**Build**
Confidence with client business and stakeholders

**Secure**
Data integrity and identity

# BUSINESS & COMMUNITY IMPACT

With Tech Mahindra's support across the carve-out journey, the bottling major was able to improve business focus, flexibility and agility and maintain market leading position across relevant geographies

Enabled an innovative and collaborative approach that ensured successful delivery of the project ahead of schedule

Simplified IT application landscape by lowering complexity in re-configuring of migrated applications
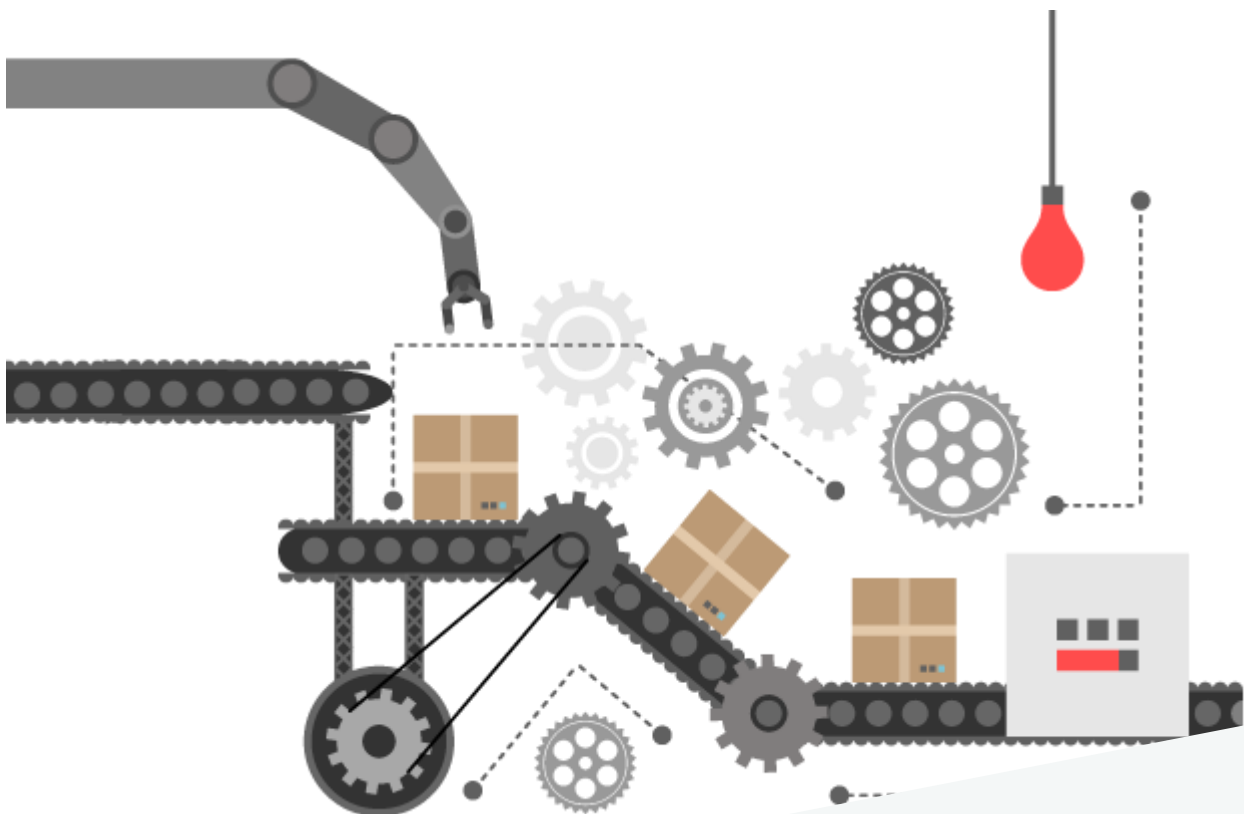

Applied minimal effort across all solutions and technologies

Ensured end-to-end collection/preparation of documents in each business and technical area

Established critical success factors and key resource planning
