The COVID-19 pandemic has forced Organizations to quickly enable their employees to work remotely for an extensive period of time. Having people work remotely changes many things. This sudden spike in Work From Home scenario has exposed enterprises to serious security risks that security teams across the world are grappling with. One of the most pressing need of the hour that almost all industries need an assurance, on validation and visibility on their security controls & compliance to standards and regulatory guidelines to be maintained, (especially to safeguard corporate assets, users and information protection both internal to enterprise and customer’s data from being compromised) The data protection principles will, of course, apply as usual so continue to observe principles of data minimisation, purpose limitation and data retention.

The most common risks for companies when it comes to regulatory compliance are the following:

- Data privacy regulators have called for stronger security safeguards on PII (Personally Identifiable Information) processing due to employee WFH
- Public health authorities may demand PII or non-identifiable data from any company which will have to honoured
- Potential lack of resources trained on privacy compliance, thus raising non-compliance risk & risk of penalties and fines

How do we address this?

- Tech Mahindra’s Pseudonymization & Anonymization as a Service ensures Pseudonymization (temporary conversion of personal data to non-personal data) and anonymization (similar feature, but permanent conversion) to help protect PII and comply with data privacy regulations
- This solution Addresses the challenge of PII Privacy Violations in the COVID crisis
- Available Remote managed service when skills manpower onsite is unavailable

© 2020 Tech Mahindra. All rights reserved.
The solution spans out in three phases

Phase 1: Data Classification Services
(Discover and Classify data where lives across every channel)

Phase 2: Data Discovery & Classification Services
(Data Discovery and Classification solution help organizations pinpoint the assets where sensitive data resides and the controls which need to be applied to protect this data)
### Business Benefits

- This Solution can be implemented with large portion of remote work
- Tech Mahindra will provide necessary consultancy from offshore
- Local deployment supported in the US, UK and APAC
- Available in both SaaS and On-Prem or Hybrid delivery model
- Support privacy compliances such as
  - GDPR
  - CCPA
  - HIPAA

### Why should you engage with us?

Tech Mahindra is the only firm to have this platform that addresses the chaos during COVID to address compliance & IT Security controls mis-configurations.

Tech Mahindra has pioneered in some of the innovation in Cyber Security domain like Deep Dark Web Services, Threat Hunting, Zero Day Attack Mitigation and AI-Micro Segmentation

Tech Mahindra has been awarded as the most Innovative Cyber security Company in the Cyber Security Excellence awards, 2019

Tech Mahindra is recognised as leaders by leading analysts like Forrester and Avasant.
