# DEVICE TESTING & CERTIFICATION

One Stop Partner for Device Commercialization

The current geo-political scenario combined with the COVID pandemic, has led to a change in how we achieve our business objectives going forward. In such challenging times, Tech Mahindra is all set to be your partner of choice, by seamlessly helping you drive your Device Engineering & Testing requirements globally. As an organization with a wide repertoire of end-to-end managed services, we are here to be your extended arm and assist you to sync up your global operations with respect to engineering, labs, support, testing, manpower requirements and many more.

Tech Mahindra is committed to ensuring the highest levels of QoS and customer satisfaction for wireless device manufacturers, providing a comprehensive portfolio of design, testing, test consulting, and certification services through a global foot print and strategically located labs. TechM enjoys the status of Assessment Capable Entities (ACE) as grated by the Global Certification Forum.

- Operator Acceptance Testing
- Conformance Lab CCF, GCF, PTCRB, CTIA, A2LA, OTA, CE, Wi-Fi Alliance, CTIA Bluetooth, BT SIG, FCC
- TechM Automation Services for Device Testing
- Global Field Testing/ Factory Testing/ Friendly User Trial Testing
- Technical Account ManagementServices for End to End Certification Process

World's #1st 5G
GCF/PTCRB APPROVED
Device Testing Lab

The Tech Mahindra Advantage:

Over 2 decades of experience on GCF / PTCRB Pre-Certification & Certification Testing on multiple Chipset vendors and with approved Test Platforms

Strong understanding and ability to add value across the complete value chain right from R&D Device Testing & Certification to the commercialization of the device

Reduced Operating/Capital Cost

One Stop Shop for Certifications: One partner to cover entire test needs – Conformance -> Operator -> Regulatory (Through partners), Global Launch

Expanded Test Coverage for Faster Time to Market

INTEGRATED ENGINEERING SOLUTIONS (IES)

Is a Connected Engineering Solutions business unit of Tech Mahindra. At **Integrated Engineering Solutions**, customers are at the core of every innovation. We align Technology, Businesses and Customers through innovative frameworks. We deliver future-ready digital convergence solutions across Aerospace and Defense, Automotive, Industrial Equipment, Transportation, Consumer Products, Energy and Utilities, Healthcare and Hi-Tech products. Our 'Connected' solutions are designed to be platform agnostic, scalable, flexible, modular and leverage emerging technologies like Networking, Mobility, Analytics, Cloud, Security, Social and Sensors, that enable launching of smart products and deliver unique connected consumer experiences, weaving a connected world. Coupled with this, our strong capabilities in Electronics, Mechatronics and Mechanical Engineering along with domain understanding and product knowledge, bring excellence to the entire lifecycle of these connected ecosystems.
