

CASE STUDY

HOW A BFSI MAJOR SECURED SENSITIVE DATA & PROCESS WITH TECH MAHINDRA MCAFEE DLP IMPLEMENTATION

BUSINESS CONTEXT

The Client faced multiple challenges with their Risk Management:

- Prevent the loss of confidential Bank data/ customer information and aid the bank to reduce the corporate risk of the unintentional or intentional disclosure of confidential information.
- Remediation of Data Leakage

APPROACH AND SOLUTION

TechM's approach and methodology was based on 3 Phases:

- Implementation of Mcafee endpoint DLP solution to protect the data leakage from the endpoint devices by applying the multiple protection rules in various categories. (e.g USB, Print, File sharing, sensitive keywords etc.)
- Implementation of Mcafee NDLP appliances to monitor & protect the data in motion and to protect the Mail and web traffic by integrating these appliances with the bank's MTA(Mail transfer Agent) & web proxy appliances.

IMPACT & HIGHLIGHTS

Addressed The Challenges Of Securing Data In Use, Data In Motion And Data In Rest

Protected The Proprietary And Sensitive Information Against Security Threats

E-mail Access Control From The Endpoints & Protected The Data At The Web Gateways.
