

i.Sustain : Transform Your Sustainably Reporting with Our ESG Data Management and Reporting Solution

Abstract

ESG data management and tracking has been a time-consuming, complex, and static process, with an evolving ESG regulatory landscape, time-consuming data collection from disparate sources, no real-time analysis, endless Excel sheets, manual accounting, complex data management landscape across value chain, and enormous data points.

Introduction

i.Sustain is a Tech Mahindra's proprietary sustainability data management and reporting solution powered by SAP® Intelligent Technologies. With over decades of experience in Sustainability, we leverage our deep domain know how and consulting capabilities and combine our SAP® technology strength to provide a solution which transforms your sustainability data into valuable ESG insights, ready to be reported.
