SwiftPLAN- Rapid deployment to help companies manage COVID-19 related planning disruptions

Safeguard Your Supply Chain

Today, supply chains are being severely disrupted from both demand and supply perspectives and are central as the driver for a sustainable rebound.

Companies must develop a rapid response to address current disruptions and strengthen operations in preparation for potential future value chain risks and a new normal.

Supply Chain Challenges

- Synchronize Demand and Supply
- Respond to short term changes in Supply & Demand
- Manage and plan across the complex supply network
- Sense actual demand for a short term horizon
- Determine optimum inventory levels to support customers

Tech M SwiftPLAN

Rapid deployment of IBP scenarios in a time boxed manner leveraging SAP Best Practices and TechM Accelerators such as Data Templates and User Manuals

During and After the COVID Pandemic, Supply Chain Disruptions will affect companies

- **Supply uncertainties** – Factory shut downs, Challenges with Raw material availability, Disruptions in Transportation
- **Fulfilment Challenges** – Restrictions both domestic and international, stretched lead times due to Customs / stringent hygiene / reduced manpower
- **Demand Volatility** – Shutdown extensions and lifts with varying duration leading to surge in demand, visibility of this demand across regions/countries, shorter lead times to respond
Let’s talk

If you’re ready to accelerate the transformation of your enterprise and build supply chain collaboration capabilities with an integrated SAP IBP solution, we’re ready to help. Contact us to get the conversation started—to request a demo, or to get additional insights that can help you strategically respond to today’s big supply-and-demand challenges.
